- Lessons Learned

Processes and stakeholders

Initial Situation for Supply, Support and Provisioning

Challenges and Problem Description

- **Data inconsistencies** due to
 - Different suppliers and formats
 - Potentially inhomogeneous processes
 - Different material information
- **Manual effort** to correct inconsistencies and data errors
- Potentially high number of **rework cycles** in context of hardware supplier or service provider
- Challenging **change** and **feedback processes** to address all relevant areas
- Keep all the **data modules** (Proced, IPD, ...) **up-to-date**

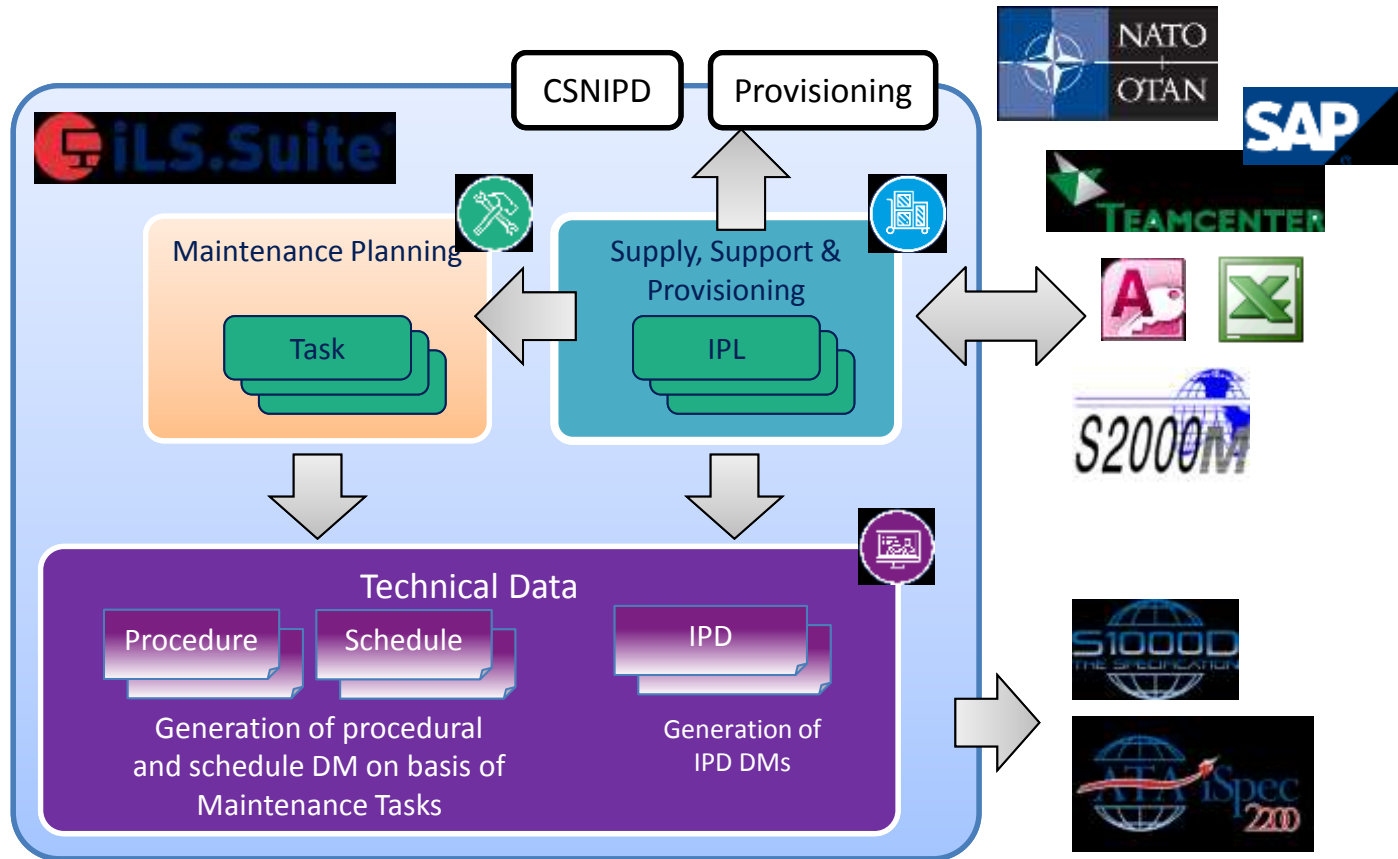

Challenges and Problem Description

In the whole maintenance development process many different types of data, stakeholders, databases and processes are involved

High risk of quality loss

Possible solution

Possible solution

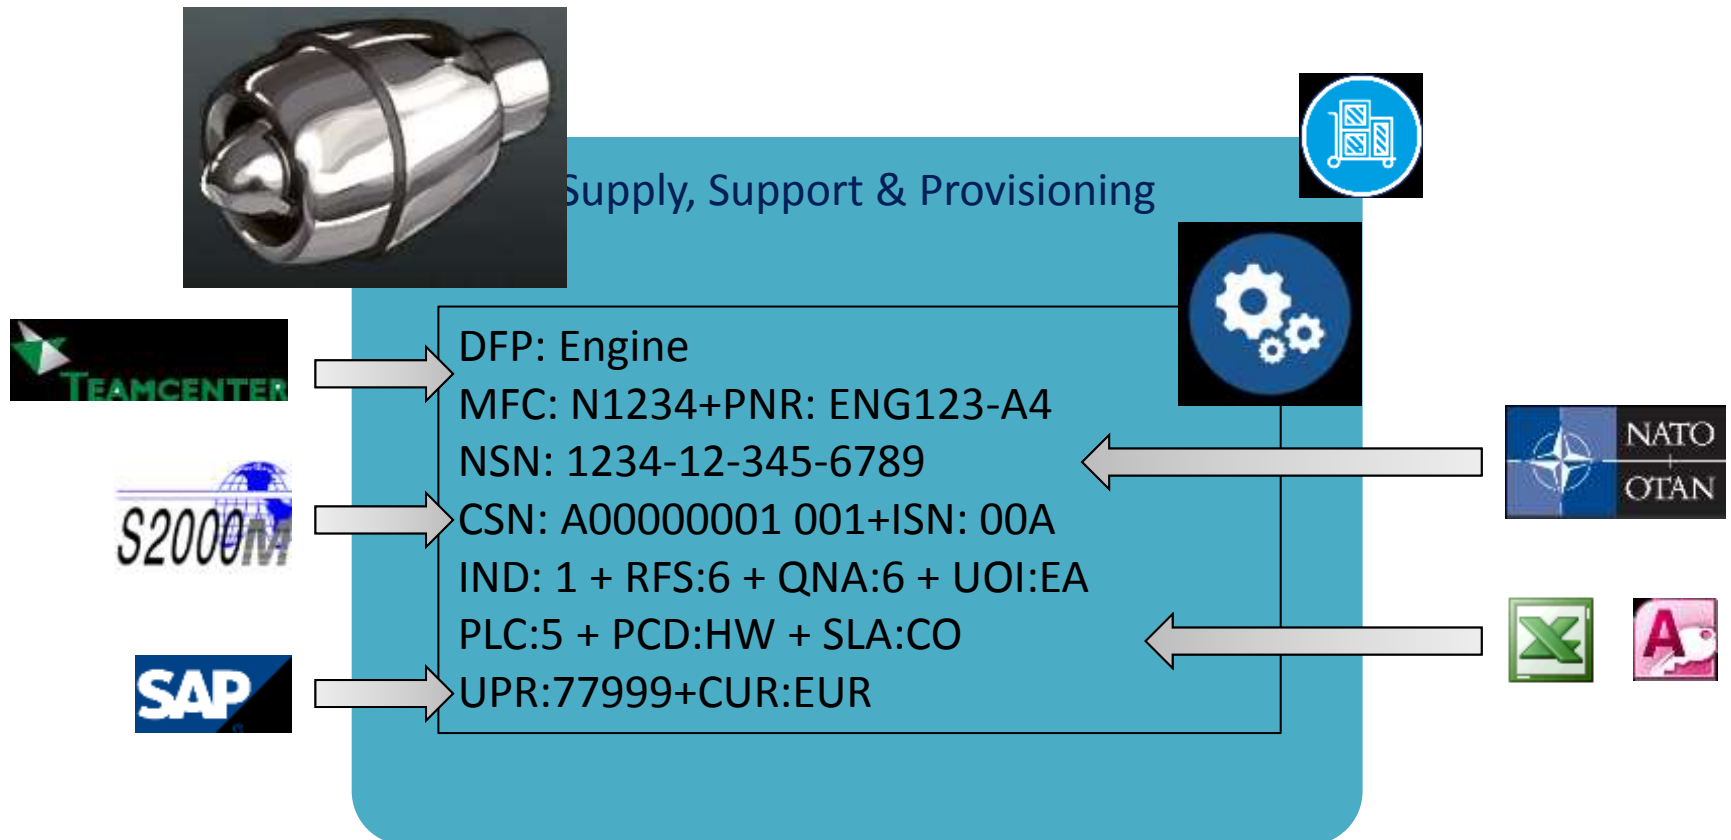

- **Reuse of data**
 - across different IPS disciplines, customers and functions
 - rise the quality and content
 - lower costs
- **Automatic Generation of**
 - **Applicability / Effectivity** via multiple customers variants or configurations
 - **IPD data modules** incl. change marks
 - **S2000M data messages** (like CSNIPD, UPIPCO, UPIPCT, etc.)
 - **Links** between Procedure and IPD data modules
- **Keep everything up-to-date**

Workflow

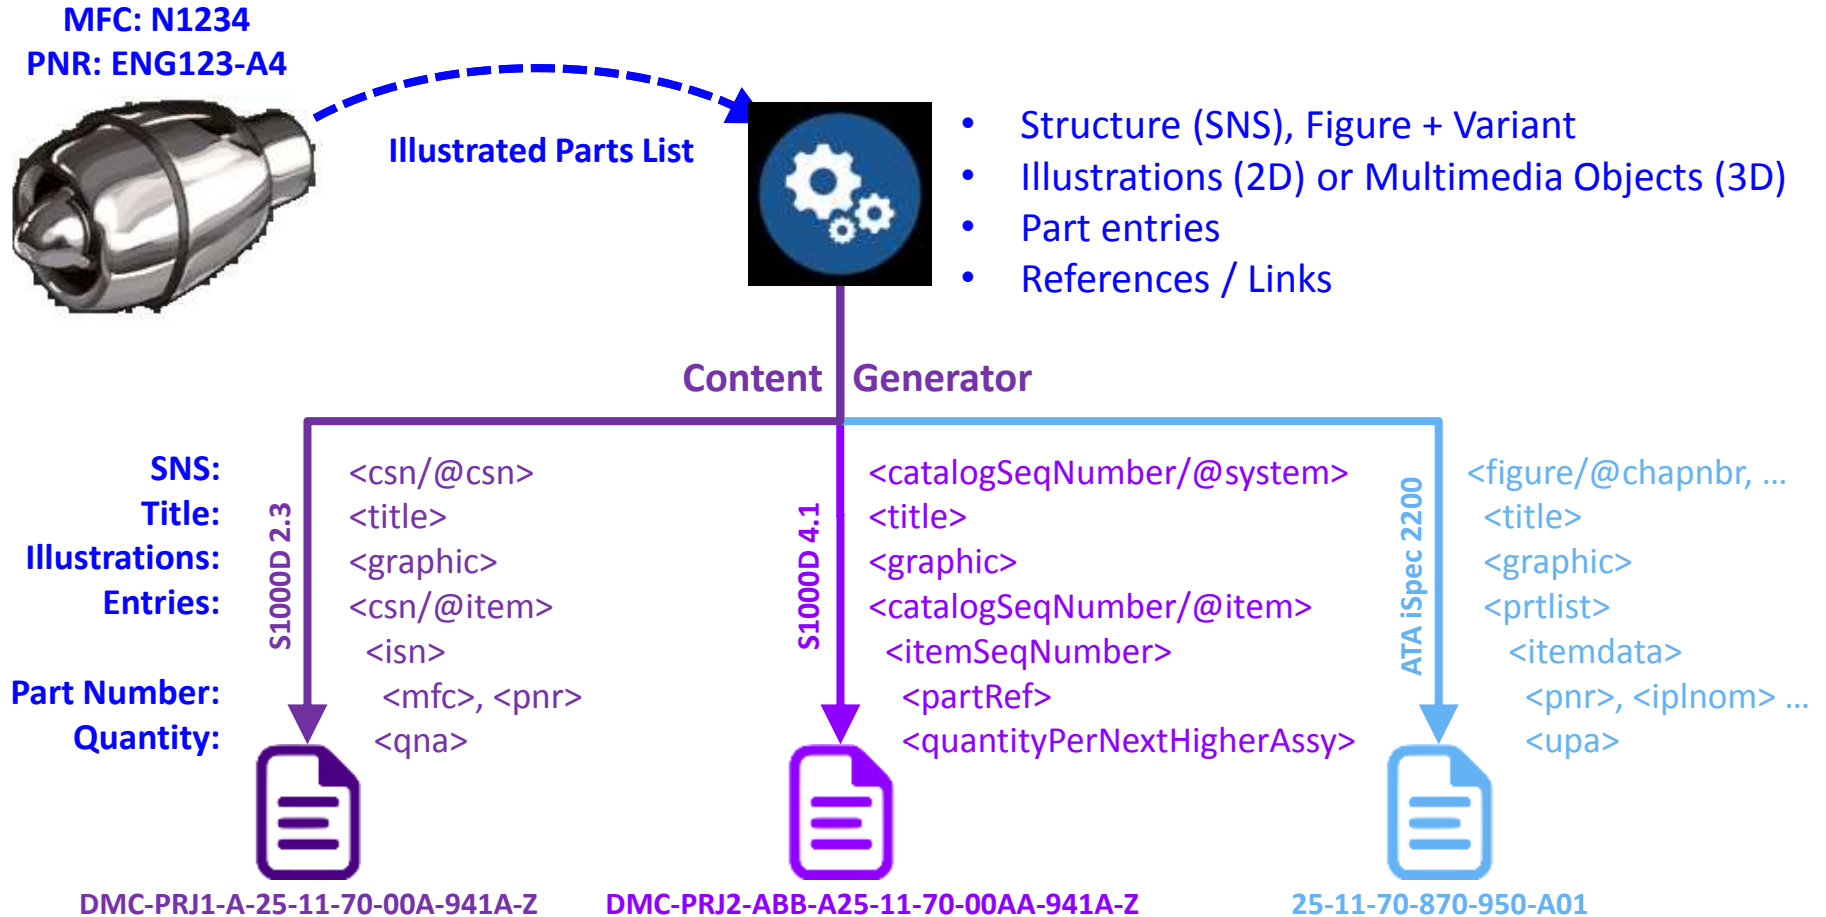

- **Import of material data** (S2000M, Excel, etc.)
- **Create Parts list** (IPD data modules)
- **Create Material list** for the authors
 - Petrol, Oil and Lubricate
 - Tools, etc.
- **Insert material** data into Procedure data modules
 - from Parts list
 - from Material lists
- **Update cycles** for Parts lists and Material lists
 - Automatic change marks in IPD & Procedure
- **Automatic check** of material data
 - in Procedure & IPD data modules
 - reports of all changed material data

Workflow: Import of material data

Workflow: Create Parts list

Workflow: Create material list

MFC: N1234
PNR: ENG123-A4

Material list

List of Tools:

- Speed Handle
- Torque Wrench
- Safety Wire Pliers
- Metal Working Tools Set A1

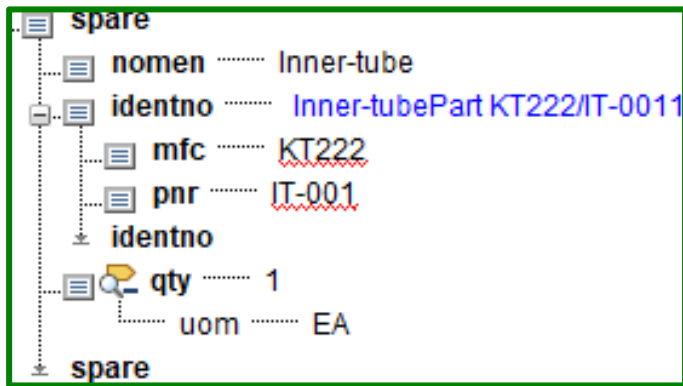

List of Petrol, Oil and Lubricate:

- Mobil Aviation Gasoline
- Mobil HyJet V Hydraulic fluids
- Aviation Grease SHC™ 100
- Mobilgrease™ 28

Workflow: Insert material

Procedure data module

Parts list:

- . ENG123-A4
- .. Fan
- .. Compressor
- .. Shaft
- ... Inner-tube

List of Tools:

- Speed Handle
- Torque Wrench
- Safety Wire Pliers
- Metal Working Tools Set A1

List of Petrol, Oil and Lubricate:

- Mobil Aviation Gasoline
- Mobil HyJet V Hydraulic fluids
- Aviation Grease SHC™ 100
- Mobilgrease™ 28

Workflow: Update cycles

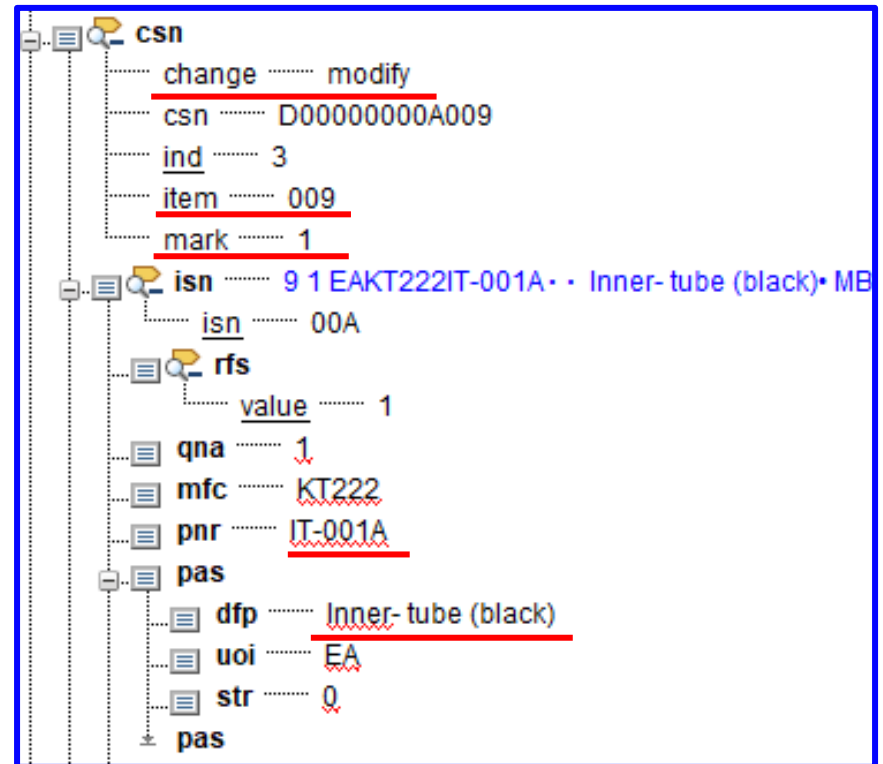

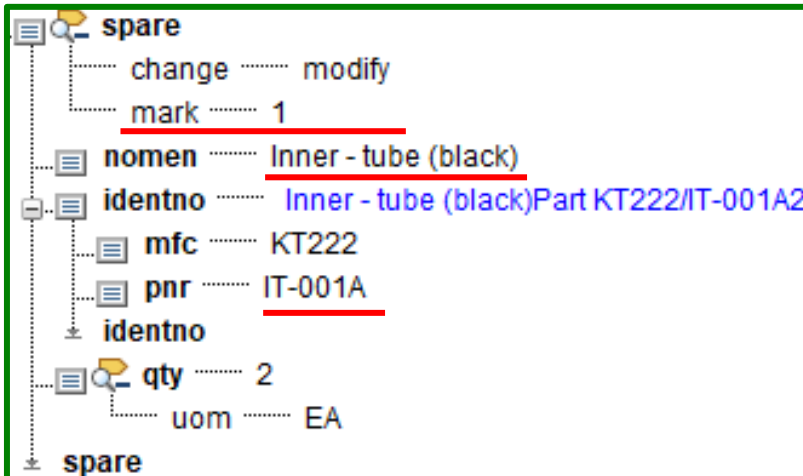

Revision A
DFP: Inner-tube
MFC: KT222
PNR: IT-001

Revision B
DFP: Inner – tube (black)
MFC: KT222
PNR: IT-001A

Automatic change tracking in DMs based on Revisions

Generated IPD Revision B

Generated Procedure Revision B

Workflow: Automatic check and reports

- **Validation against material rules**

Notice Article 'Bremse vorn - H1T06 / MTB-BRS800-801' (Issued) (Core) is invalid according to the Material-Project.

Warning * 'QTBF' is mandatory if 'TBF' is not empty. QTBF must be filled when TBF is used. (Core)

Notice Article 'Front Wheel - 09WWM / MTB-WH10AV' (Edit) (Core) is invalid according to the Material-Project.

Warning * 'AUL' is mandatory. AUL is mandatory. (Core)

Warning * 'NSN' '123455' must match the regex `^[0-9]{13}$|^[0-9]{4}$`. The NSN must be 4 or 13 diggits. (Core)

- **Show changes during Import**

Info Processing Article: 'D0854 / HDK6' 'NUT, SELF-LOCKING, EXTENDED WASHER'

Info * Article attribute 'PNR' changed from 'HDK6' to 'HDK699'

Info * Article attribute 'NSN' changed from '4820121640300' to '4820121640301'

Info * Article attribute 'Article.Name[en]' changed from 'NUT, SELF-LOCKING, EXTENDED WASHER' to 'NUT,

- **Validate against Schema, BREX, Hotspots, etc.**

Info **Validate hotspots**

Info Processing Parts List 'S1000DBIKE - BICYCLE: D00-00-00-00-AA - Fahrrad'

Warning * No hotspot exists for entry '006' in illustrations for variant 'sx-US'.

Warning * No hotspot exists for entry '006' in illustrations for variant 'de-DE'.

Warning * No hotspot exists for entry '006' in illustrations for variant 'hu-HU'.

Lessons Learned

- **Reused data requires**
 - Part data rules
 - Applicability rules
 - Change Management rules
- **Authoring process**
 - Update material data in various data modules
 - Scraping unused content from existing data modules
- **IPD Generation**
 - Creating general scripts to populate material data
 - Automatically generate Line Item Effectivity & Change marks
- **Reports**
 - Changes must be reported to the right persons

Thank you
for your attention!
